# Sustainability Accounting Standards Board (SASB) Standards

In alignment with the SASB Standards, we report against the two sector standards that most closely reflect our business: Non-Alcoholic Beverages and Appliance Manufacturing. The following index provides KDP's key disclosures and references relevant sections within our [2025 KDP Impact Report](#). For additional detail, including assurance on data for the report, see Data Table section of the [2025 KDP Impact Report](#).

	Description of water management risks and discussion of strategies and practices to mitigate those risks	Discussion and Analysis	N/A	FB-NB-140a.2	We operate in areas of high baseline water stress, and stress is projected to increase over time. Our water efficiency target aims to reduce KDP's impact to local water supplies and our water stewardship efforts implement water replenishment and conservation in areas of highest water risk where we have operations. Water Use & Stewardship, pages 10-13 Data Table, pages 41-49 <a href="#">Our Impact</a>
Health & Nutrition	Revenue from (1) zero- and low-calorie or energy-free and low-energy, (2) no-added-sugar and (3) artificially sweetened beverages	Quantitative	Reporting Currency	FB-NB-260a.1	We do not report this publicly. We're committed to disclosing the percent of our product portfolio in the U.S. that will provide positive hydration. Positive hydration is defined as a product that provides a serving of fruits or vegetables (with no added sugar) or is 40 calories or less per serving with a functional attribute or at least 10% Daily Value of a nutrient to encourage. We also disclose sales-weighted added sugar reduction across the portfolio on an annual basis. Consumer Health & Well-Being, pages 23-27 <a href="#">Our Impact</a>

Because our risk assessments show that the major social and environmental risks are at the farm and factory levels, we focus our efforts on upstream suppliers. For coffee and cocoa, we rely on verification or third-party certification programs. For our factory-based inputs, we report on the outcomes of audits via KDP's Supplier Rating System. Both approaches include audits and corrective action processes for major and minor non-conformities. Human Rights, Responsible Sourcing & Supply Chain Livelihoods, pages 19-22 <a href="#">Our Impact</a>
Ingredient Sourcing	Percentage of beverage ingredients sourced from regions with High or Extremely High Baseline Water Stress	Quantitative	Percentage (%) by cost	FB-NB-440a.1	We report the percentage of key ingredients (by volume) sourced from areas of water stress based on our most recent water risk assessment in 2021. This corresponds very closely to reporting the percentage by cost. Specific to cane sugar, we disclose the percentage based on global average baseline water stress. The data related to our 2025 volumes procured was as follows:

	List of priority beverage ingredients and discussion of sourcing risks related to environmental and social considerations	Discussion and Analysis	N/A	FB-NB-440a.2	We use third-party risk data, as well as other industry group data, to assess our ingredients based on social and environmental risk factors. We consider risk level, spend, volume purchased, KDP influence and opportunity for impact and other factors to determine the prioritization of our ingredients. Our 2025 priority beverage ingredients are: coffee, cocoa, corn, apple, apple juice concentrate, citrus juice concentrate, functional ingredients, high-intensity sweeteners, preservatives, tomato paste and tropical juice concentrate. Key environmental risks for these ingredients include climate change, deforestation, agrochemical use and biodiversity. Our strategy to address these risks is shaped by our regenerative agriculture efforts. Key social risks include wages and benefits, child labor, forced labor, migrant workers and working hours. Our strategy to address these risks is shaped by our various responsible sourcing commitments and tools, e.g. audits, trainings and corrective actions.
